# DIESEL GENERATOR SET MTU 16V4000 DS2250

380V - 11 kV/50 Hz/Grid Stability Power/TA-Luft Optimized MTU 16V4000G14F/Water Charge Air Cooling

Optional equipment and finishing shown. Standard may vary.

# PRODUCT HIGHLIGHTS

#### // Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals

#### // MTU Onsite Energy is a single-source supplier

### // Support

- Global product support offered

#### // Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

#### // Power Rating

- System ratings: 2120 kVA 2160 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

# // Performance Assurance Certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 100% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

#### // Complete range of accessories available

- Control panel
- Power panel
- Circuit breaker/power distribution
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical and electrical driven radiators
- Medium and oversized voltage alternators

#### // Emissions

- TA-Luft optimized

## // Certifications

- CE certification option
- Unit certificate acc. to BDEW (German Grid-Code)

# // Engine

Manufacturer		MTU
Model	16V4	-000G14F
Туре		4-cycle
Arrangement		16V
Displacement: I		76.3
Bore: mm		170
Stroke: mm		210
Compression ratio		16.4
Rated speed: rpm		1500
Engine governor		ECU 9
Max power: kWm		1798
Air cleaner		Dry
// Fuel System		
Maximum fuel lift: m		5
Total fuel flow: I/min		20
// Fuel Consumption®		
	I/hr	g/kwh
At 100% of power rating:	472.2	218
At 75% of power rating:	346.1	213
At 50% of power rating:	234	216

# // Liquid Capacity (Lubrication)

lotal oil system capacity: I	300
Engine jacket water capacity: I	175
Intercooler coolant capacity: I	50

# // Combustion Air Requirements

Combustion air volume: m³/s	3.2
Max. air intake restriction: mbar	50

# // Cooling/Radiator System

Coolant flow rate (HT circuit): m <sup>3</sup> /h	68.5
Coolant flow rate (LT circuit): m <sup>3</sup> /h	30
Heat rejection to coolant: kW	790
Heat radiated to charge air cooling: kW	460
Heat radiated to ambient: kW	90
Fan power for electr. radiator (40°C): kW	70

# // Exhaust System

Exhaust gas temp. (after turbocharger): °C	480
Exhaust gas volume: m³/s	7.4
Maximum allowable back pressure: mbar	85
Minimum allowable back pressure: mbar	30

 $<sup>\</sup>odot$  All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

② Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

### // System Ratings (kW/kVA)

Generator model	Voltage		TA-Lu				
		without radiator			with mechanical radiator		
	kWel	kVA*	AMPS	kWel	kVA*	AMPS

(Medium volt. Leroy Somer)							

<sup>\*</sup>  $\cos phi = 0.8$ 

#### // Engine

- 4-Cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Closed crankcase ventilation with improved oil seperator
- Governor-electronic isochronous
- Common rail fuel injection
- TA-Luft optimized engine
- Centrifugal oil filter

#### // Generator

- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater
- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP23
- Insulation class H, utilization acc. to H
- Radio suppression EN55011, group 1, cl. B

- Short circuit capability 3xln for 10sec
- Winding and bearing RTDs (without monitoring)
- Excitation by AREP
- Mounting of CT's: 2 core CT's
- Winding pitch: 2/3 winding
- Voltage setpoint adjustment ± 10%
- Meets NEMA MG-1, BS 5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS1359 and ISO 8528

requirements

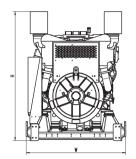

- Leroy Somer low voltage generator
- ☐ Marathon low voltage generator
- ☐ Oversized generator
- ☐ Medium voltage generator

Drawing above for illustration purposes only, based an standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System
Open Power Unit (OPU)

Dimensions	(LxWxH)
1766 v 1910 v	2220 mm

Weight (dry/less tank)

12428 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

#### SOUND DATA

// Consult your local MTU Onsite Energy distributor for sound data.

# **EMISSIONS DATA**

NO <sub>x</sub> + NMHC	CO	PM
1700	300	50

#### All units are in mg/Nm<sup>3</sup>

Emission levels of the engine may vary as a function of ambient temperature, barometric pressure, humidity, fuel type and quality, installation parameters, measuring instrumentation, etc. The data provided refers to ISO standard ambient conditions (25°C and 100m above sea level). The data provided are laboratory results from one engine representing this rating. The data was obtained under controlled environmental conditions with calibrated instrumentation.

# RATING DEFINITIONS AND CONDITIONS

- // Grid Stability Power ratings apply to installations serving electric utility programs. At constant or varying load, the number of generator set operating hours is limited to 1000 hours per year with no more than 500 hours per year at 100% load without interruption. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789. Average load factor: ≤ 100%.
- // Consult your local MTU Onsite Energy Power Generation Distributor for derating information.

Materials and specifications subject to change without notice.
