# DIESEL GENERATOR SET MTU 12V4000 DS2250

380V - 11 kV/50 Hz/Standby Power/Fuel Consumption Optimized MTU 12V4000G94LF/Water Charge Air Cooling

Optional equipment and finishing shown. Standard may vary.

# PRODUCT HIGHLIGHTS

#### // Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals

## // MTU Onsite Energy is a single-source supplier

## // Support

- Global product support offered

#### // Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

#### // Power Rating

- System ratings: 2300 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

# // Performance Assurance Certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 85% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

## // Complete range of accessories available

- Control panel
- Power panel
- Circuit breaker/power distribution
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical and electrical driven radiators
- Medium and oversized voltage alternators

#### // Emissions

- Fuel consumption optimized

#### // Certifications

- CE certification option

# // Engine

| Manufacturer             | MTU         |
|--------------------------|-------------|
| Model                    | 12V4000G94F |
|                          |             |
| Type                     |             |
| Arrangement              | 12V         |
| Displacement: I          | 57.2        |
| Bore: mm                 | 170         |
| Stroke: mm               | 210         |
| Compression ratio        | 16.4        |
| Rated speed: rpm         | 1500        |
| Engine governor          | ECU 9       |
| Max power: kWm           | 1930        |
| Air cleaner              | Dry         |
| // Fuel System           |             |
| Maximum fuel lift: m     | 5           |
| Total fuel flow: I/min   | 27          |
| // Fuel Consumption®     | l/hr g/kwh  |
| At 100% of power rating: | 463 199     |
| At 100% of power rating: |             |
| At 75% of power rating:  | 339 194     |
| At 50% of power rating:  | 233 200     |

# // Liquid Capacity (Lubrication)

| Total oil system capacity: I    | 260 |
|---------------------------------|-----|
| Engine jacket water capacity: I | 160 |
| Intercooler coolant capacity: I | 40  |
|                                 |     |

# // Combustion Air Requirements

| Combustion air volume: m³/s       | 2.4 |
|-----------------------------------|-----|
| Max. air intake restriction: mbar | 50  |

# // Cooling/Radiator System

| Coolant flow rate (HT circuit): m <sup>3</sup> /h | 55  |
|---|-----|
| Coolant flow rate (LT circuit): m <sup>3</sup> /h | 30  |
| Heat rejection to coolant: kW                     | 790 |
| Heat radiated to charge air cooling: kW           | 475 |
| Heat radiated to ambient: kW                      | 75  |
| Fan power for electr. radiator (40°C): kW         | 55  |

# // Exhaust System

| Exhaust gas temp. (after engine): °C        | 460 |
|---|-----|
| Exhaust gas temp., max (after engine): °C   | 550 |
| Exhaust gas temp. (before turbocharger): °C | 700 |
| Exhaust gas volume: m³/s                    | 6.2 |
| Maximum allowable back pressure: mbar       | 50  |

 $<sup>\, \</sup>oplus \,$  All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

② Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

## // Engine

- 4-Cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Closed crankcase ventilation
- Governor-electronic isochronous
- Common rail fuel injection
- lacksquare Fuel consumption optimized engine

#### // Generator

- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater
- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP23
- Insulation class H. utilization acc. to H
- Radio suppression EN55011, group 1, cl. B

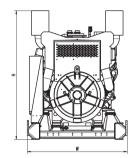

- Short circuit capability 3xIn for 10sec
- Winding and bearing RTDs (without monitoring)
- Excitation by AREP + PMI
- Mounting of CT´s: 3x 2 core CT´s
- Winding pitch: 2/3 winding
- Voltage setpoint adjustment ± 5%
- Meets NEMA MG-1, BS 5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS1359 and ISO 8528 requirements
- Leroy Somer low voltage generator
- ☐ Marathon low voltage generator
- ☐ Oversized generator
- $\square$  Medium voltage generator

Drawing above for illustration purposes only, based an standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

Dimensions (LxWxH) 4077 x 1810 x 2330 mm Weight (dry/less tank)

11130 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

## SOUND DATA

// Consult your local MTU Onsite Energy distributor for sound data.

# **EMISSIONS DATA**

// Consult your local MTU Onsite Energy distributor for emissions data.

# RATING DEFINITIONS AND CONDITIONS

- // Standby ratings apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. No overload capability for this rating. Ratings are in accordance with ISO 8528-1, ISO-3046-1, BS 5514 and AS 2789. Average Load Factor: ≤ 85%. Operating hours/year: max. 500.
- // Consult your local MTU Onsite Energy Power Generation Distributor for derating information.

Materials and specifications subject to change without notice.
